

Empire Airlines Vendor Manuals

Our current manuals (Fueling, De-Ice, etc.) can be found on the following website:

<https://www.empiremanuals.com/>

If you have any printed copies of older revisions, please destroy them. All printed copies of the manual are considered for reference only. Please only use the manuals provided at the above website, which can also be accessed with the following QR code.

For your convenience, this QR code is on each Empire Airlines aircraft “Operated by” placard located on the left side near the nose of the aircraft, to pull up the current manual on a mobile device.

If there is a change in your designated Fueling Trainer, please email the new contact information to

mx_training@empireairines.com

A "Training Record Form MT41" for the current revision must be completed by your fuel trainer and on file with our training department, and all personnel tasked with fueling our aircraft must have documentation filed at your location showing training to the latest revision.
